

2010 CONTINUING JOURNEYMEN TRAINING

IMPORTANT NOTES

1. Classes are held at Georgia Sheet Metal JATC 575 Fair Dr., SW Atlanta, GA 30315
2. Night classes 5:00 PM – 9:00 PM
3. Saturday classes 7:00 AM – 3:30 PM
4. Any scheduled orientations are mandatory.
5. In the event of inclement weather call the JATC office for the latest school closing information. Any cancellation due to inclement weather will be added to the training schedule.
6. Each Journeyman will be required to sign an iTi Scholarship Loan Agreement.
7. To register for training a \$100.00 deposit (check or money order only) will be required and returned upon completion of the course provided you attend the minimum number of hours set for the particular class.
8. To register for any course call (404) 753-6466 ext.100 and sign up. Remember space is limited and registrations are on a first come first served basis. Sign up today.

BASIC SMAW

This 24 hour course will be held on Saturdays (see dates below). This course will cover the basic principles of the SMAW (stick) welding process. This class is great for those who have little or no experience with SMAW or are looking to brush up on their skills. Class size is limited to 10 participants.

February 6, 20 and March 6

BASIC GTAW

This 24 hour course will be held on Saturdays (see dates below). This course will cover the basic principles of the GTAW (tig) welding process. This class is great for those who have little or no experience with GTAW or are looking to brush up on their skills. Class size is limited to 10 participants.

March 20 and April 3, 10

BASIC GMAW

This 24 hour course will be held on Saturdays (see dates below). This course will cover the basic principles of the GMAW (mig) welding process. This class is great for those who have little or no experience with GMAW or are looking to brush up on their skills. Class size is limited to 10 participants.

April 17, 24 and May 1

STRUCTURAL WELDING

This 40 hour course will be held on Saturdays (see dates below). This course will cover the principles of welding 3/8 plate per the D1.1 Structural Welding Code. Participants in this class should have good SMAW and GTAW welding skills. A certification will be offered at the conclusion of the class. Please note that you must attend the required number of hours for the course to certify with this class. Class size is limited to 10 participants.

May 8, 15, 22, 29 and June 5

OSHA - 30

This course (see calendar) covers subject areas that are the leading cause of injury and death in the construction industry. The student will be able to identify common causes of accidents and fatalities and how to avoid them. Course completion cards will be issued by OSHA. Completion cards have no expiration date. This is a 30-hour course and will be held at night during the week.

June 8, 9, 10, 14, 15, 16, 21, 22

FOREMAN TRAINING

This 20 hour course is intended to help you build the foundation that will be necessary for your development as a foreman should you choose such a career path. The course will be taught by a veteran foreman currently working in the field. This class will be held at night during the week.

April 21, 28 and May 5, 12, 19

PROJECT MANAGEMENT

This 12 hour course covers material that the Project Manager needs to complete a successful project. Units include: The Project Manager, Construction Documents, Controlling Costs, Preparing for the Project, Schedules & Meetings, Paperwork, Quality Control & Productivity, Tool, Equipment and Materials, Legal Considerations and Completing the Project. This class will be held at night during the week.

March 11, 18, 25

READING PLANS & SPECS.

This 20 hour course is designed to help union sheet metal workers become skilled at reading plans and specifications – the documents that explain how a building is to be built. This class will be held at night during the week.

May 26 and June 2, 9, 16, 23

LEVEL 1 HVAC FIRE LIFE SAFETY SYSTEMS

This 16 hour course is designed to provide the considerations for installing, inspecting, and maintaining fire dampers, smoke dampers, combination fire/smoke dampers and ceiling dampers in HVAC systems in new and existing buildings. This class will be held at night during the week with a certification exam at the conclusion of the class.
